Temirlan Abdykarimov

AI / ML Engineer

Astana, Kazakhstan • +7 747 404 0451 • github.com/MataVsn

Profile

AI/ML Engineer with a software engineering background in backend, distributed, and event-driven systems. Currently developing AI solutions in the banking industry and pursuing a Master's degree at QAIRU. Experienced with Python-based machine learning workflows, C#/.NET, and large open-source codebases, with 40+ pull requests contributed to active repositories.

Experience

AI Engineer — Commercial Bank (Confidential) **2026 – Present**

- Contribute to the development and integration of AI and machine learning solutions for banking use cases.
- Participate in data preparation, ML experimentation, model development, evaluation, and production-oriented integration.
- Explore practical applications of large language models and collaborate with engineers and domain specialists on AI-enabled workflows.

Backend / Systems Developer — Open Source, SS13 / SS14 Ecosystem **2021 – Present**

- Develop C#/.NET gameplay and backend systems for large multiplayer projects using ECS, client-server synchronization, and event-driven architecture.
- Implement modular inventory, interaction, equipment, container, and layered visual synchronization systems.
- Debug, refactor, and improve maintainability across large collaborative codebases; contributed 40+ pull requests to active repositories.

No-Code Developer — ACS Solutions **2025 – 2026**

- Built automation bots and business workflows using no-code platforms, databases, and automation-oriented backend logic.
- Structured business data and visualized processes and system architecture to support internal workflow optimization.

Technical Skills

AI / Machine Learning: Machine Learning, Large Language Models (LLMs), supervised learning, regression, classification, feature engineering, data preprocessing, model training and evaluation

Python / Data Science: Python, Pandas, NumPy, Scikit-learn, TensorFlow, Jupyter, Matplotlib

Software Engineering: C#/.NET, Java, Spring Boot, REST APIs, client-server architecture, ECS, event-driven systems, OOP, SOLID

Data / Tools: SQL, PostgreSQL, MySQL, Git, GitHub, debugging, refactoring, pull-request workflows

Education

Master's Degree, Information Technology / Artificial Intelligence **2026 – 2027**
QAIRU, Astana, Kazakhstan

Bachelor's Degree, Software Engineering **2020 – 2024**
International Information Technology University (IITU), Almaty, Kazakhstan

Languages

Russian: Native **English:** Upper-Intermediate (B2)
